

## WIRELESS FFR MEASUREMENT WITH OUTSTANDING HANDLING PERFORMANCE

The innovative PressureWire Aeris with Agile Tip technology is the world's first and only wireless pressure guidewire for fractional flow reserve (FFR) measurement. Featuring a proprietary symmetrical tip, PressureWire Aeris provides extraordinary agility and excellent torque response in sharp bends, allowing physicians to perform reliable FFR more quickly and easily, even in tortuous anatomies. The hydrophilic coating significantly lowers friction and enables smoother stent delivery and better overall maneuverability.

### FAST AND EASY FFR

- Near 1:1 torque response<sup>1</sup> enables exceptional performance in tortuous anatomies, matching frontline PCI guidewires
- Smooth, effortless stent/balloon delivery<sup>1</sup>
- Better maneuverability than other pressure guidewires in *in vitro* testing<sup>1</sup>

### TRUE FFR™

- 2.6 times lower pressure drift per hour as compared to competitive pressure guidewires in *in vitro* testing<sup>2</sup>
- St. Jude Medical PressureWire Aeris and PressureWire Certus™ were the only FFR guidewires used in both FAME and FAME 2 studies

### WIRELESS FFR

- PressureWire Aeris is the world's only wireless pressure guidewire for FFR assessment

## Ordering Information

### PressureWire Aeris Agile Tip

| Reorder Number | Description                               |
|----------------|---|
| C12058         | PressureWire Aeris with Agile Tip, 175 cm |

1. St. Jude Medical. Data on File.
2. St. Jude Medical. Data on File. Average pressure drift from 25 competitive pressure guidewires and 50 PressureWire Certus during one-hour simulated clinical use in heparinized blood.
